

Portex UniPerc Adjustable Flange Tracheostomy Tube

UR: _____

Surname: _____

Given Name(s): _____

Date of birth: _____

Affix Patient Label Here

TUBE INFORMATION

- The UniPerc Tracheostomy Tube is a longer tube with flange which can be adjusted by the Surgeon/Intensivist to suit the individual patient
- Used in patients who have a large amount of pre-tracheal tissue (large neck)
- The tube has a high volume, low pressure cuff which can be inflated/deflated with air
- Has a dedicated reusable (up to 29 days) inner cannula
- Inner cannula must be regularly removed and washed with the provided cotton swab

CLINICAL ALERTS

- Do NOT release blue locking clamp
- Releasing the locking clamp may cause the tube to fall out

- Measure the external tube length once per shift

Measurement _____ mm
